

## Zydeco Fact Sheet

**Shell Midstream Partners**

Zydeco (Ho-Ho) provides a critical outlet to alleviate current transportation bottlenecks of crude oil arriving in Houston, TX from the Eagle Ford shale, Permian Basin and Bakken shale.

Zydeco is a batched system capable of carrying multiple grades of crude.

Connects to several crude oil pipelines in Houston and Port Neches/Nederland Spans over 350 miles and has a mainline capacity of 375 kpbpd

- SPLC's employees operate Ho-Ho for Zydeco
- SHLX will have voting control

Approximately 87% of the fully expanded capacity of Ho-Ho will be subject to ship-or-pay contracts with a weighted average remaining term of over eight years.
